

Course Code: AI4002	Course Name: Computer Vision
Student Roll No:	Section:

Deadline: 27/09/2026

Total Marks: 30 points

Read the research paper, “Shadows Don’t Lie and Lines Can’t Bend! Generative Models don’t know Projective Geometry...for now” and answer the following questions. Submit the answers in your handwritten scanned document otherwise you will end up getting zero mark. **AI generated answers are strongly discouraged.**

Question # 01: (5 Marks)

What problem is the paper, “Shadows Don’t Lie and Lines Can’t Bend! Generative Models don’t know Projective Geometry...for now” solving and why does it matter? or What specific task or limitation does it address? (e.g., object detection, 3D reconstruction, segmentation, multimodal learning etc.) or What gap in prior work does it claim to fill?

Question # 02: (5 Marks)

What is the main idea or technical contribution?

Question # 03: (8 Marks)

How does the proposed method work? Explain what are the main components of the method?

Question # 04: (4 Marks)

What datasets are used and What baselines are compared? Write names of datasets and baselines do not miss any.

Question # 05: (4 Marks)

What’s your opinion, does it generalize? Or When might this method fail?

Question # 06: (4 Marks)

What new research questions does it open?

Best of Luck
